

DATASHEET

Adobe® Capture Handheld

Extend core business processes to your mobile workforce

Organizations with mobile workers—such as sales reps, service technicians, and inspectors—can reduce costs, increase revenues, and improve customer satisfaction by empowering their mobile workers with remote access to core enterprise systems.

Adobe Capture Handheld

Adobe solutions extend and accelerate business processes, helping people work smarter and more productively. Adobe Capture Handheld gives your remote workers access to corporate applications and data, and lets them submit captured information using Pocket PC and Handheld PC mobile devices. And submitting data—either through wireless connectivity or file transfers—is a snap.

Adobe Network Publishing Solutions

Adobe Central Pro Output Server is an integral component of Adobe Network Publishing Solutions, helping businesses and people work together more productively and effectively.

Key Features

Advanced Data-Capture Solution

Capture Handheld provides the broadest range of features available for intelligent data capture on handheld devices—ranging from simple text capture to complex bar codes, digital images, and electronic signatures—with built-in calculation and validation capability. Data capture is easy, with point-and-click tools such as dropdown menus and check boxes.

Integration with Back-Office Systems

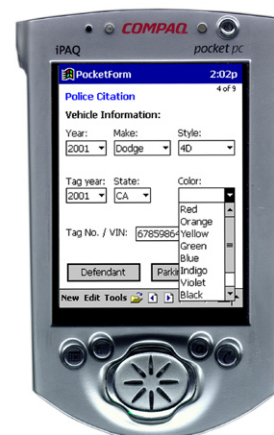

Mobile workers can easily submit data to core systems, providing up-to-the-minute information that everyone can share. Employees submit data through wireless transfer or cradle-base synchronization and participate in the capture of information, initiate business processes, and perform subsequent approval steps—all without setting foot in the office. Back-office integration is achieved through a number of different methods including SQL Server or Access database synchronization, e-mail, or Web server posting.

Downloading Forms from the Web

Capture Handheld works with the Adobe Form Server—the platform that eases deployment of forms over the Web. Anyone with a connected handheld device can download forms from the Internet or an intranet. Once forms are downloaded, users simply complete them with the usual validations, saving, and form-signing capabilities. When forms are complete, users reconnect to submit the information captured.

Secure Electronic Signatures

Capture Handheld comes equipped with out-of-the-box digitized signature capability. When a legally enforceable digitized signature is captured, the solution's biometric technology captures the signature's shape, velocity, acceleration, and stroke dynamics—validating its authenticity. Once signed, fields on a form are locked, protecting it from tampering.

Additional Features

- Manipulate more than 50 calculation and validation functions for form templates
- Easily integrate with existing applications, using an XML-based solution
- Send form data as e-mail attachments
- Read and write capabilities to SQL Server CE and Pocket Access databases
- Print directly from Pocket PC or Handheld PC devices to an infrared mobile or desktop printer
- Use with other Adobe process management and document generation solutions
- Take advantage of Microsoft Pocket Outlook support to send forms and data captured on the device
- Utilize support for custom DLLs, providing developers with extended functionality

EMPOWER YOUR MOBILE WORKERS WITH ADOBE CAPTURE HANDHELD

- Let sales reps in the field check inventory levels and book orders immediately.
- Enable insurance auditors to attach digital photos to their electronic reports.
- Allow doctors and nurses to update patient records in real time.

System Requirements

Adobe Capture Handheld

Device: Pocket PC (2002 or Windows® CE 3.0) or HandHeld PC (2000 or 2.1.1), 16MB of RAM or more (32MB recommended), 300KB–400KB RAM

Processor support: SH3, SH4, MIPS, or ARM® and StrongARM®

Desktop: ActiveSync® 3.1 or later, Intel® Pentium® 166MHz or faster processor, 32MB of RAM or more, 3MB of disk space available

Adobe Form Designer

Intel Pentium processor with 42MB of RAM (266MHz with 64MB of RAM recommended) 42MB of disk space, and Microsoft Windows 95, 98, 2000, or Windows NT®
