# Adobe®
Output Pak
for Oracle E-Business Suite

Effective customer–facing documents
from Oracle E-Business Suite

Companies implementing Oracle® E-Business Suite realize the benefits of integrating their data with their business processes. However, what customers see is not the integrated data management, but the document output produced as a result: order confirmations, checks, shipping documents, and invoices. These documents provide the human interface to data and are a company's key touchpoint with customers.

The Adobe Output Pak for Oracle E-Business Suite greatly enhances the appearance and effectiveness of customer touchpoint documents, enabling you to improve communication with your customers while reducing costs. This XML-based solution allows you to produce personalized, customizable documents quickly and easily from Oracle E-Business Suite, without draining resources. Adobe document generation solutions work with your business processes, extending business information to create sophisticated customer-focused document output.

Report-like document produced by Oracle E-Business Suite

Adobe document generation technology combines data and formatting to generate professional-looking documents for delivery via PDF, print, e-mail, fax, or the Web.

Adobe

Adobe Network Publishing Solutions

Adobe Output Pak for Oracle E-Business Suite is an integral component of Adobe Network Publishing Solutions, helping businesses and people work together more productively and effectively.

Key Features

Ready-to-Use Document Templates

Adobe Output Pak for Oracle E-Business Suite includes a comprehensive set of prebuilt document templates, including those most commonly required, in both landscape and portrait page orientation. It's easy to customize these templates with your company information, getting you up and running quickly. This Adobe document generation solution also provides the tools to easily create documents from any Oracle report, enabling fast integration of new document templates beyond those included with the Output Pak.

Flexible Output in Multiple Formats

Adobe Output Pak for Oracle E-Business Suite provides the power and flexibility your business needs in a document generation solution. With it, you can deliver documents in a variety of formats for delivery via Adobe Portable Document Format (PDF), print, e-mail, fax, or the Web. This Adobe document generation solution integrates easily with Oracle E-Business Suite and works in conjunction with Oracle Reports™ to extract XML data. The data is then merged with a document template you create with Adobe's easy-to-use document template designer. The result is an extremely flexible and cost-effective way to create and maintain customer-facing documents.

Dynamic Documents

Adobe Output Pak for Oracle E-Business Suite has capabilities that make it easy to tailor any touchpoint document for a specific audience or customer. For instance, the same document template is used to generate an invoice with three or 150 detail lines—the data itself controls the appearance of the final document. This means that Output Pak for Oracle E-Business Suite also enables you to include personalized messages in documents, leading to increased upsell opportunities and stronger brand awareness.

Worldwide Document Delivery

Adobe Output Pak for Oracle E-Business Suite can generate documents in a variety of languages including English, French, German, Swedish, Spanish, Italian, Finnish, Norwegian, Danish, Portuguese, Czech, Polish, Hungarian, Russian, Simplified Chinese, Traditional Chinese, Korean, and Japanese.

Easy Document Design

Adobe Output Designer, a WYSIWYG design tool used with Adobe Output Pak for Oracle E-Business Suite, enables you to customize documents with company logos, graphics, and bar codes. Just point and click to create exact electronic replicas of existing paper documents or to design even the most complex new documents. No more waiting for an Oracle Reports programmer to modify reports to make even minor document changes. You decide where fields, logos, signatures, and bar codes print—making changes in minutes, not hours or days.
