

Adobe® Output Pak for mySAP.com

Effective customer-facing documents from mySAP.com

Many companies today invest in SAP™ solutions to streamline business operations and improve customer relationships. However, customers don't see the behind-the-scenes data management. They see the documents produced by the system—the purchase orders, invoices, shipping documents, and checks.

Adobe document generation solutions work with your SAP systems to create sophisticated, customer-focused documents. Adobe Output Pak for mySAP.com transforms report-like information from your SAP system into professionally formatted, dynamic business documents that enhance your corporate image, and does so without the need for expensive custom programming or preprinted forms inventories. This solution improves your customer communications by enabling you to include personalized messages within documents.

A screenshot of a report-like document generated by a SAP system. It contains multiple tables with columns for item numbers, descriptions, quantities, and prices. The text is dense and lacks the visual polish of a professional document.

Report-like document produced
by SAP system

A screenshot of a professional invoice generated by Adobe document generation solutions. It features a clean layout with a header, a table for line items, and a footer. The document is visually appealing and easy to read.

Adobe document generation
solutions combine data and formatting
to generate professional-looking documents
or PDF, print, e-mail, fax, or Web delivery.

Adobe Network Publishing Solutions

Adobe Output Pak for mySAP.com is an integral component of Adobe Network Publishing Solutions, helping businesses and people work together more productively and effectively.

Key Features

Dynamic Document Design

Adobe Output Designer, a WYSIWYG document template design tool used with Adobe Output Pak for mySAP.com, lets you make document changes quickly and easily. Dynamic capabilities also make it easy to tailor any document for a specific audience or customer. For instance, the same document template is used to generate an invoice with three or 150 detail lines—the data itself controls the appearance of the final document.

Worldwide Document Delivery

Multi-language document generation is a clear requirement for companies operating in today's global economy. To support businesses operating in multiple countries, Adobe Output Pak for mySAP.com can generate documents in a variety of languages, including English, French, German, Swedish, Spanish, Italian, Finnish, Norwegian, Danish, Portuguese, Czech, Polish, Hungarian, Russian, Simplified Chinese, Traditional Chinese, Korean, and Japanese.

Flexible Output in Multiple Formats

Adobe Output Pak for mySAP.com dynamically delivers documents to customers and business partners in a variety of formats. It integrates directly with SAP to capture information and merge it with a template that defines the layout of a document. The result is an extremely flexible and cost-effective way to create and maintain sophisticated documents for delivery via Adobe Portable Document Format (PDF), print, fax, e-mail, or the Web.

Additional Features

- Includes a set of ready-to-use document templates and layout sets for rapid implementation
- Tightly integrates with SAP's proven Raw Data Interface (RDI), providing printing, archiving, e-mail, and fax selection directly from SAP
- Features SAP XML Smart Forms (XSF) data interface for printing from SAP Smart Forms
- Provides in-the-box integration with popular SAP document archiving solutions, EASY® Archive, and IXOS® Archive
- Produces high-fidelity, high-volume output in multiple formats to multiple delivery devices, including PDF, print, e-mail, fax, the Web, and label printers
- Generate documents that can contain fixed and variable text in any font, including bar codes, logos, boxes, lines, colors, and calculations, and can contain sophisticated dynamic layouts and pagination
- Includes Form Builder to create new document templates directly from existing SAP layout sets
- Significantly reduces network traffic by sending a simple data stream across the network for local formatting and printing
- Produces multiple documents from one data stream; for example, prints shipping documents and labels in one transaction
- Can be integrated with popular output management systems, such as Quest Vista Plus Output Manager (QMaster™), Macro 4, Dazel, and Siemens®
